KEY INVESTMENT HIGHLIGHTS

01

Global Market Leader in Cube Automation

AutoStore commands 25%+ global market share in cube-based warehouse robotics — a differentiated, patent-protected technology with no direct equivalent. 1,000+ installed systems globally across 50+ countries.

02

Recurring Revenue Mix Approaching 40%

Software, subscriptions and after-market services growing as % of revenue, driving margin visibility and re-rating potential. Service revenue commands structurally higher margins than hardware.

03

Best-in-Class EBITDA Margins: 35%+

Asset-light, IP-driven model delivers sustained 35%+ EBITDA margins. Operating leverage on a fixed cost base supports further margin expansion as revenue scales.

04

Capital-Light Model & Strong FCF Conversion

Low maintenance CapEx (~1.5% of revenue) and high cash conversion underpin aggressive debt paydown. Net cash position anticipated by exit Year 3, unlocking value.

05

Multiple Exit Pathways

Strong exit optionality: strategic acquirer (KION, Dematic, Honeywell), financial secondary, or re-IPO. Sector consolidation and automation spend trends underpin demand.

06

Compelling Returns: 19.2% IRR / 2.4x MOIC

5-year base case generates 19.2% IRR driven primarily by debt paydown (NOK 70,855mm) and EBITDA growth (NOK 24,333mm), partially offset by moderate multiple contraction.

FINANCIAL PERFORMANCE

Revenue & EBITDA (NOK mm)
